

# Graphing Survey Data

## **Purpose**

Take a survey of the class and "Make a Chart" of the data in Appleworks Spreadsheet.

## **Tasks**

Survey the class on a question. An example would be "What is your favorite color?"

Create a spreadsheet in Appleworks and put data in table.

Create a bar graph and a pie graph of the data.

## **Requirements**

Title on each graph - 24 point font.

Each axis is labeled appropriately both vertical (y-axis) and horizontal axis (x-axis).

A "key" for the pie graph. Use patterns to show the different pieces of the pie.
